Since we started Phase 5c on Wednesday 28th October we have detected 14 cases through our border testing policy, or through contact tracing.

We have had 30 cases since September 2020.

11 of these were from the cluster.

COVID-19
Bailiwick Testing Strategy: Current

- Symptomatic people
- Contacts of Cases
- Travellers
- Hospital admissions
- Critical workers
- Pregnant women
- Pre-surgery
- Compassionate

GUERNSEY Local Resilience Forum
States of Guernsey Public Health Services
Enhanced surveillance testing could and should be used to mitigate this risk with the dual aims of:

- Detecting more infections in travellers before they can be spread to the community; and
- Achieving early detection of any escaped cases/clusters, which can be targeted with the test/trace/isolate processes to interrupt any ongoing transmission and snuff out outbreaks before they lead to widespread community transmission.
COVID-19

Vulnerable Groups

Know
Use accurate and up to date information, know the symptoms and what to do if you feel unwell

Prepare
Have enough groceries, medication, etc. keep physically active and activate your social network

Protect
Wash your hands, avoid people who are unwell outside of your home, consider social distancing and enhanced hygiene
## COVID-19

### Masks / Face coverings

The Swiss Cheese Defence

No single intervention is perfect at preventing spread

Each intervention (layer) has imperfections (holes) but multiple layers improve success

Personal Responsibilities

Shared Responsibilities

- Physical distance: stay home if sick
- Hand hygiene and cough etiquette
- Avoid touching your face if crowded, limit your time
- Wearing a facemask
- Fast and sensitive testing and tracing
- Ventilation, outdoors, air filtration
- Government messaging
- Quarantine and self-isolation
- Vaccines

COVID-19 Winter Preparedness

No community transmission - sporadic imported cases only

First confirmed case of community transmission that is controlled by track and trace measures

Virus is circulating in the community (two or more community cases with no causal links identified)

Sustained spread of virus in the community

Sustained local transmission, multiple transmission chain from unrelated cases, rapid doubling time in number of cases

Face covering guidance

No change from present guidance: while there is no evidence of virus circulating in the community, use of face coverings is a personal decision

Face coverings remain optional and are a personal decision

Use of face coverings in enclosed crowded places and on public transport is recommended

Strongly recommend use of face coverings as above

Face covering guidance

No change from present guidance: while there is no evidence of virus circulating in the community, use of face coverings is a personal decision

Face coverings remain optional and are a personal decision

Use of face coverings in enclosed crowded places and on public transport is recommended

Strongly recommend use of face coverings as above
COVID-19

Students

We want to welcome our returning students. I personally want to thank those who have already returned for sticking to the rules and behaving responsibly. I know that I have spoken to many of you and I have been really impressed with the care you have taken. You too, are a shining example of #GuernseyTogether

I know self-isolation may be difficult and that most of you will have had a very difficult first term of this academic year. We are here to help and support. Please do contact us if you have any concerns. There are also resources available at [gov.gg/coronavirus](http://gov.gg/coronavirus)
