

PORT TRANSFERS AND SUBSEQUENT ON-ISLAND TRANSFERS FOR COVID TESTING OR CRITICAL WORKERS

Getting from the port to an isolation address: Where possible try to arrange a lift from a friend or family member, or get a car left at the port so you can drive yourself.* When this is not possible the following list of Taxi / Private Hire Operators can be used.

If you know you will need to use a taxi/private hire operator it is strongly recommended that you pre-book your transfer before travelling to the Island. Please note that you are not permitted to use Public Bus Services to travel to an isolation address and that you should go straight to your identified place of isolation without stopping anywhere on the way.

All of the above Operators will accept advance bookings. Please note that most operators will apply a minimum fare (private hire rate). This is to reflect additional measures they need to carry out to comply with hygiene and social distancing guidelines currently in place for journeys where the passenger/s are under a self-isolation order.

You will need to wear a face mask until you are inside your identified isolation address and follow the instructions of the driver to ensure compliance with the above measures. This will include sitting in the rear of the vehicle with the window open and handling your own luggage unless you are unable to do so on health grounds.

Only one person or a family group travelling to a single place of isolation can travel in the same vehicle.

The above list of operators can also be used for appointments at Covid testing stations or in respect of journeys undertaken by critical workers who may remain subject to social distancing controls.

***Free** Airport car parking is currently available for up to two hours. Alternatively, Home James can offer a car return service – book@homejames.gg or Tel: 07839 744438.
