Date: 15 December 2021

2d bar code to include booster information from Thursday 16 December 2021

The 2d bar code digital vaccination certificate, available to Bailiwick residents through the Travel Tracker, will include information on their booster from Thursday 16 December 2021.

This new development for the Bailiwick's 2d bar code will ensure travellers are able to demonstrate their full, up-to-date vaccination status when travelling anywhere where the bar code is required for travel or access to venues.

It follows ongoing close working between the States of Guernsey, NHSx and UK partners.
